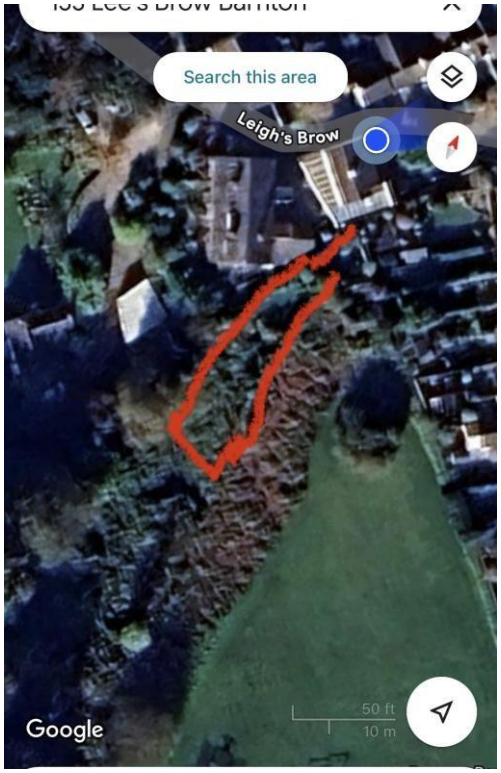
I am emailing to request the process of purchasing land in the village. My husband and I live at [redacted] Leigh's brow, and have done since 2020, the house we live at has been in our family since 2002.

There is a piece of land at the back of our garden, in between the park. We have a gate to this and until approximately 6 years ago could access the park from our garden but there is now a big fence up. The small bit of land in question isn't owned by anyone and isn't being used, we hope to use this to grow vegetables for our 3 children. I will attach a satellite photo of this and I would be grateful for information to go about going ahead with the purchase.



Land that is owned by the Parish Council is not for sale.

You will appreciate that a precedent cannot be set as there are many properties backing onto community spaces.

Who do I speak to who is in charge of making this decision? As I would like to put a debate forward and take this further.

This is a small fenced area off area, away from the playing field. With your point of being many properties that back onto this, in fact there are only 2, one of which is us and an elderly lady who we know well. Therefore I struggle to see how this is a communal space.

We currently have a gate to the space and could be accessed by via the other property by others with no regulation. Having ownership of this would not change the current usage of the land, the positive would be that the land would owned,maintained appropriately and kept tidy
